Is That of the Meaning of "United States."

SOLUTION IS VITAL

In the Solving of Pending Insular Problems,

(Special Correspondence of the Eagle.) Washington, Feb. 7 .- At the time of the organization of house committees it was expected that the committee of ways and means for this session would be secondary to that of insular affairs in importance. Recent developments have proven that this will not be true. The committee of ways and means will remain the leading committee of the house. It all comes up over the bill by Mr. Payne to extend the custom laws of the United States over Puerto Rico. This brings into prominence a constitutional question that has slumbered for a half century, and makes it the gravest and deepest ques tion of the hour-a question as to what is the meaning of the "United States. The constitution says that "duties, im posts and excises shall be uniform throughout the United States." If the term United States means all territor, which this country possesses, then th tariff laws must perforce be the same in Purto Rico as in the Kansas. If not, then it is the duty, and privilege of congress to make legislation that will apply The contention of the Democratic party is that the moment we assumed posses sion and ownership of Puerto Rico, the constitution became self-operative as to this island-became the supreme law of the island. The Republican contention is that there is a distinction between the term "United States," as generally meant and used, and "United States" as mean by the constitution. On the solution of this guestion depends, practically, the reention of the Philippines, and the committee of ways and means, by strict party vote, has already decided in favor of the Republican contention. According to the Republican theory, and along the ines indicated by the Republican majority of the committee of ways and means, the term "United States" means the original thirteen states, which existed when the constitution was ratified, and those states, not territories, which have ome into the unkin since that time. This, they claim, does not apply to unorganized territories or possessions which are

The question goes back to the latter 40's and early '50's, when those constitu tional giames, Webster on the one sid and Calhoun on theother, waged their war in the senate on a question identical with the one now before congress in the point involved-"what is the meaning of United States?" It came up over the Louisiana and Oregon questions, Later the Missouri compromise was re-opened. This measure provided that territory north of Mason and Dixon's line should be free soil. Seeing all the good territory in the north coming to be organized as territories, and prospective states, and realizing that they were getting further away all the time on slave represents tion and comirol in the senate, the Democrats raised the point of the unconstitu fionality of the Missouri compromise They claimed that it was unconstitutional because the moment these possessions came into the United States' control, the water.
